fontinstall /skin/Hermes/lavender-dream

✓ tool completed

X error state

lavender-dream ready

Soft purple twilight — gentle lavender, bluish pink, and mint

lavender-dream

A color palette for the 'lavender-dream' font, showing 12 swatches of various shades of purple, lavender, and pink.

A screenshot of a terminal window with a light beige background. The terminal shows the following text:
\$./skin lighthouse-beam
✓ tool completed
X error state
lighthouse-beam ready
Weathered light theme — fog-
To the right of the terminal, the text "lighthouse-beam" is displayed in a large, bold, black font. Below the terminal output, there is a horizontal row of ten small, square color swatches in various shades of gray, brown, and blue.

A screenshot of a terminal window with a dark background. The prompt is '\$'. The command entered is '/skin linen-sage'. The output shows 'Hermes sage' on the next line. Below that, a green checkmark indicates 'tool completed', and a red 'X' indicates 'error state'. The prompt changes to 'linen-sage ready'. At the bottom, there is a text label 'Linen fabric — natural flax background with muted sage' and a row of 11 color swatches: a white swatch followed by 10 swatches of varying shades of sage green.

`$ /skin
Hermes manuscript`

`✓ tool completed`

`X error state`

`manuscript ready`

Vellum light — sepia ink text,
alt accents, and deckled-

A screenshot of a terminal window with a dark background. The text in the terminal is as follows:

```
% /sbin  
Hermes midnight-  
studio  
  
✓ tool completed  
✗ error state  
  
midnight-studio ready
```

Below the terminal window, there is a row of ten colored squares: dark blue, light blue, yellow, dark blue, dark blue, light blue, yellow, light blue, light blue, and dark blue. To the right of the terminal window, the text "midnight-studio" is displayed in a large, white, sans-serif font.

A terminal window showing the installation of the 'moss-stone' tool. The commands and output are: '\$ /skin moss-stone', 'Hermes stone', '✓ tool completed', '✗ error state', and 'moss-stone ready'. To the right of the terminal is a color palette with 12 swatches, and below it is a text description: 'Cool forest stone — gray-green granite, soft olive, and'.

A screenshot of a terminal window with a dark background. The text in the terminal is as follows:

```
$ /skin nebula-  
Hermes drift  
  
✓ tool completed  
✗ error state  
  
nebula-drift ready
```

Below the terminal window, there is a row of ten color swatches in various shades of purple and blue. To the right of the terminal window, the text "nebula-drift" is displayed in a large, white, sans-serif font.

A terminal window with a dark background. The text inside is as follows:
\$./skin neon-koi
Hermes

✓ tool completed
✗ error state

neon-koi ready

Below the terminal window is a color palette with 10 squares. The first two are dark grey, the next three are orange, and the last five are light blue. Below the palette is the text: "Night market pond dark — silver text, koi:orange".

A terminal window with a dark background and yellow border. The text shows the installation of netrunner via Hermes. It starts with a prompt '\$' followed by '/skin' and 'netrunner'. Then 'Hermes' is shown. A green checkmark indicates 'tool completed'. A red 'X' indicates 'error state'. Finally, 'netrunner ready' is shown. To the right of the terminal is the word 'netrunner' in a large, white, sans-serif font. Below the terminal window is a row of ten colored squares: black, yellow, orange, teal, light blue, dark blue, light grey, yellow, teal, and orange.

A screenshot of a terminal window. The prompt is '\$'. The user has entered '/skin pencil-sketch'. The terminal output shows 'Hermes sketch' on the next line. Below that, a green checkmark is followed by 'tool completed'. Then, a red 'X' is followed by 'error state'. Finally, the text 'pencil-sketch ready' is displayed. To the right of the terminal window, the text 'pencil-sketch' is written in a large, bold, black font. Below the terminal window, there is a row of 11 small square icons in various shades of gray.

A terminal window with a black background and green text. The text shows the execution of 'phosphor-burn' and its completion. Below the terminal, there is a color calibration bar with 11 color patches and their corresponding names: CR1 ghost-image dark, crla ghost-image dark, CR1 ghost-image, crla ghost-image, CR1 ghost-image, crla ghost-image, CR1 ghost-image, crla ghost-image, CR1 ghost-image, crla ghost-image, and CR1 ghost-image.

A terminal window with a dark background. The prompt is '\$'. The command entered is '/skin red-alert'. The output is 'Hermes' on the next line. Below that, a green checkmark is followed by 'tool completed', and a red 'X' is followed by 'error state'. The prompt changes to 'red-alert ready'. To the right of the terminal, the text 'red-alert' is displayed in a large, bold, black font. Below the terminal output, there is a horizontal row of 12 colored squares: black, red, white, orange, dark red, light blue, dark blue, light orange, dark orange, light grey, dark grey, and red.

A terminal window with a dark background and green border. The text inside shows the installation of 'redwood' using 'Hermes', the completion of the tool, an error state, and the readiness of 'redwood'. To the right of the terminal is the word 'redwood' in a large, bold, black font. Below the terminal and the word 'redwood' is a horizontal color calibration bar with 11 squares of different shades, ranging from dark brown to light beige.

A terminal window with a dark background. The text inside is:

```
$ /skin rust-  
Hermes belt  
  
✓ tool completed  
X error state  
  
rust-belt ready
```

 To the right of the terminal is a color calibration bar with 11 squares of varying shades of gray and brown. Below the terminal window, the text "Oxidized iron dark — bone" is visible, followed by a small portion of another line of text.

A terminal window with a dark background. The prompt is '\$'. The command entered is '/skin sahara-dusk'. The output shows 'Hermes' followed by 'dusk'. Below this, a green checkmark indicates 'tool completed', and a red X indicates 'error state'. At the bottom, it says 'sahara-dusk ready'. To the right of the terminal, the text 'sahara-dusk' is displayed in a large, white, serif font. Below the terminal window, there is a color bar with 10 swatches: dark grey, black, dark blue, light blue, dark red, red, dark green, green, dark yellow, and yellow.

A terminal window with a dark background. The prompt is '\$'. The command '/skin sandstone' has been entered. The output shows '✓ tool completed' in green, 'X error state' in red, and 'sandstone ready' in white. To the right of the terminal is a color palette with 10 swatches: black, dark brown, medium brown, light brown, tan, white, light gray, medium gray, dark gray, and black.

```
$ ./skin seafoam-silk
Hermes silk

✓ tool completed
✗ error state

seafoam-silk ready
```

seafoam-silk

Tide pool at dawn — soft
